

LBIG City Performance Indicator

Lincoln BIG works with trusted data suppliers to provide intelligence on footfall and customer spend within the Lincoln BIG BID area. These insights allow us to understand city's performance, compare trends and make more informed decisions. They are shared with members and key stakeholder to facilitate dialogue and to provide a wider measurement of value for the activities that are undertaken within the city.

Footfall Data

Footfall data provided by Proximity Future's GDPR compliant GEO-Sense application is a people counting footfall system specifically designed for use on the High Street and retail environment. GEO-Sense provides anonymous information based on unique visitor numbers requiring no end user interaction.

Dedicated sensors gather anonymised data providing information on unique visitor counts which unlike traditional systems allows GEO-Sense to provide enhanced reports such accurate visitor numbers, dwell time, visitor movements and frequency of visits.

- See p7 & p8 for glossary/references

Spend Data

Customer spend analysis provided by Beauclair. Data is collected by Beauclair from a National data set of offline transactions from over 11 million debit card accounts. Each transaction is geo-tagged to track merchant location, retail sector and online vs offline transaction. All merchant and customer data is strictly anonymised and aggregated to comply with GDPR and data protection requirements.

Through Beauclair data we are able to compare the city data versus other towns and cities across the UK, such as Norwich, York, Chester and Nottingham

Beauclair sector descriptions

BEAUCLAIR TERM	DEFINITION
Metric	One of the measures of retail performance provided by Beauclair, namely: ARPC, ATV, Customers*, Sales*, Sales Contribution, Transactions*. * Based on the demographic mix of customers and is calculated via sophisticated statistical modelling which compares Beauclair's dataset to a detailed demographic model of the whole UK.
Sales*	Calculated total debit card sales in a retail area.
Transactions*	Calculated total number of debit card transactions in a retail area.
Customers*	Calculated unique number of debit card account holders undertaking transactions in a retail area.
Average Transaction Value (ATV)	Sales divided by Transactions.
Average Revenue Per Customer (ARPC)	Sales divided by Customers.
Retail Area	The retail area within which transaction data is measured.
Comparator Area	A retail area against which clients can compare the performance of their own retail area.
Sector Sales Contribution	The percentage of overall sales attributable to one of ten sectors.
Demographic Group	Groups of retail customers sharing similar economic, age, lifestyle and behaviour characteristics. We use MOSAIC , powered by EXPERIAN.
Demographic Group Contribution	The percentage of overall sales attributable to customers from a specified demographic group.
Customer Catchment Area	An area where a group of customers live.
Customer Catchment Area Contribution	The percentage of overall sales attributable to customers who live in a specified customer catchment area.
GB Benchmark	Our GB Benchmark is the median retail performance of the retail areas at the centre of the UK's Primary Urban Areas (excluding Belfast) as defined by Centre for Cities .
Normalised Value	Data is presented relative to the value of a metric for the average month in 2022. A normalised value of 100 is equal to the value of that metric for the average month in 2022.
